

The Resilience and Recovery Plan by the Italian Government to access to the Next Generation EU funds includes about 220 billion for investments in key topics such as: Industry, Sustainability, Circular economic, Agriculture, Energy, Energy efficiency improvement and Environmental protection. In details, Mission 2 is addressed to the "Green revolution and ecological transition" (green, circular and fair economy, waste life cycle, decarbonation of economy, innovation and smart nets). The annual meeting of ASIC intends to highlight the status of rabbit production and science in view of the new perspectives. The latest guidelines of the Italian Ministry of Health will be presented together with the funding possibilities, besides some research activities addressed to the sustainability of rabbit production.
